

FOOD SAFETY POLICY

SASA Polyester Sanayi A.Ş. is a raw material supplier for the food and beverage packaging industry along with integrated polyester and chemicals production. Our priority is to provide reliable packaging raw materials that comply with food safety requirements.

PURPOSE

SASA aims to carry out activities that meet customer demands and establish customer satisfaction within the framework of compliance with national and international food safety standards with the SPC Strategic Business Unit processes related to food packaging raw material production.

SCOPE

This policy covers

- MTR production unit - CP9 Plant and its auxiliary departments producing for the food packaging industry,
- All employees of the said departments,
- All employees and temporary SASA employees are included in the contracts of the contractor company, subcontractor, and other third-party companies.

POLICY DECLARATION

As **SASA**, we are aware that reaching the expected targets in food safety and safe packaging applications requires determination, continuous improvement, and investment in resources.

In this regard, we are committed;

- To meeting FSSC 22000 requirements,
- To fulfilling national and international food safety legislation obligations,
- To meeting the food safety demands of our food packaging manufacturer customers and to maintaining customer satisfaction,
- To investing in human, technology, and other necessary resources to ensure the continuity of food safety compliance,
- To creating and disseminating food safety awareness in all relevant units and suppliers,
- To determining, monitoring and periodically reviewing food safety goals and objectives,
- To implementing HACCP, GMP and other related process control management programs.
